

QUALITY, STYLE
& PERFORMANCE

01

A Proud History of Energy Efficiency

For 40 years energy efficiency has been our driving passion. Rylock design and specify products for Australia's diverse landscape, with a focus on high performance double glazing and frame conductivity.

02

Custom Fabricated Contemporary Profiles

Rylock's aluminium profiles were originally designed to emulate the appearance of timber products. They are custom fabricated from locally sourced materials in our state of the art facilities which features CNC tooling for precision repetition machining.

03

Our Tailored Consultation

Rylock's knowledgeable Sales Consultants provide a personalised and free advisory service. This considers your site location and orientation to maximise natural air flow, whilst enhancing your connection with the outdoors.

04

Extruded Flyscreen Frames

Rylock products are available with high quality flyscreens for optimal comfort throughout your home. Extruded frames deliver superior strength and maintain their shape compared to weaker roll-formed alternatives. They feature a heavy duty wool pile to discourage insects into your home.

05

Superior Design with Inline Reveals

All Rylock products have the timber reveal inline with the aluminium frame. This ensures they're as easy to fit as traditional timber windows, whilst the timber reveal 'shields' part of the aluminium frame to minimise heat transfer and improves energy efficiency.

Thirty Standard Colours & Textures

Powder coating is undertaken in-house and independently tested by the CSIRO for durability. The 30 standard finishes include traditional tones, contemporary metallics and ColorBond™ favourites - plus five coatings from the Interpon Textura™ collection.

06

Multiple Weather Seals

All Rylock products feature at least two weather seals on every moving panel to reduce drafts, rain and intrusive noise. All glass is installed between flexible seals to ensure weather tightness and rattle-free glazing.

07

Technical Resource Library

Rylock has an extensive online library for building-in installation detail with 3D interactive renders, as well as operation and adjustment videos. Specifiers and Builders can also download the comprehensive AutoCAD™ and Revit™ Library resources.

08

Extensive Site Service Capability

Rylock products have increased in size to meet the needs of contemporary architecture and design trends. All products greater than 60kg's are expertly site glazed by specialist Site Activities Teams.

09

Australian Made and Owned

Rylock products deliver quality, style and performance. They are designed, specified and custom manufactured with Australia's diverse landscape in mind. We welcome you to visit our interactive showrooms and take a guided tour of our state of the art manufacturing facilities.
