

COLOURS AND TEXTURES

Ultimate Customisation
Hand-coated premium powder coat finish

Powder Coating

Rylock products are custom made to enhance a home's unique architectural style. Window and door frame colour should be considered along with the remaining building materials during product selection.

30 Standard Colours & Textures

Featuring 30 standard colours and textures, Rylock's aluminium frames are powder coated in-house, by hand to deliver the highest level of quality control to withstand Australia's local climatic conditions.

7 Stage Pre-Treatment

The 7 stage pre-treatment process ensures an optimal bond with the aluminium and Rylock's semi-automated powder coating process has been independently tested by CSIRO for durability.

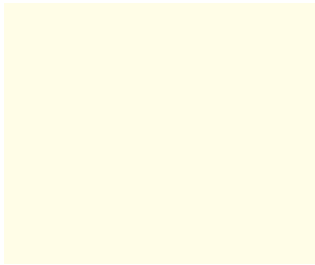

The colours and textures range includes traditional tones, contemporary metallics and ColorBond™ favourites, which can be selected to match or contrast with other accent colours throughout the home. The Interpon Textura™ range offers additional depth and character, combining visual (colour) and tactile (texture) design elements to reinforce a design aesthetic that is complemented by superior anti-mar protection.
